DETAILED ACTION

1. Applicant's arguments filed 28 October 2004; with respect to claims 1-3, 5-7 and 9-20 have been fully considered and are persuasive. Therefore, the rejection of last office Action has been withdrawn.

REASONS FOR ALLOWANCE

2. Claims 1-3, 5-7 and 9-20 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-3, 5-7 and 9-20, the claimed features "a method for synchronizing multiple data sets, the method comprising: said data repository storing user information that is a super-set of all user information for which any user desires synchronization support" in conjunction with other elements of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

3. The closest prior art, Boothby et al. U.S. Patent Number 5,684,990 relates to programs that synchronize databases. Man-Hak Tso et al. U.S. Patent Number 5,706,509 relates to synchronization of data between different applications at the record level, more particularly, to the methods and apparatus for synchronizing data among any applications.

Art Unit: 2162

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2162
